PROFESSIONAL SUMMARY

Recent Cybersecurity Analytics graduate with a strong foundation in vulnerability management, SOC analysis, and identity and access management (IAM). Combines hands-on development skills with technical support experience to troubleshoot complex systems and secure network infrastructures. Currently advancing expertise in cloud security and ethical hacking

TECHNICAL SKILLS

- Security & Analytics: SIEM fundamentals, log analysis, threat modeling, vulnerability assessment, Linux security, and incident response concepts.
- Networking: TCP/IP, DNS, DHCP, VPN, network troubleshooting, firewalls, routing concepts.
- Frameworks & Compliance: NIST, ISO 27001, CIS Controls, SOC 2
- Cloud & Virtualization: Microsoft Azure, AWS, Cloud Security Fundamentals, and VirtualBox Management.
- Operating Systems: Windows OS administration, Linux, MacOS, and relevant command-line tools.
- Programming & Scripting: Python, PHP, Bash scripting, SQL, JavaScript, and C#
- Tools: Wireshark, Nmap, Metasploit, Burp Suite, Microsoft Office Suite, and ticketing systems.
- Soft Skills: Active listening, customer support, analytical thinking, and attention to detail.

EDUCATION AND CERTIFICATIONS

Graduate Certificate – Cyber Security Analytics
Mohawk College

September 2025 - April 2026

- Performed hands-on security labs simulating real-world cyberattacks, applying threat detection, incident response, and vulnerability assessment techniques
- Designed and evaluated security controls across networks, systems, and cloud environments aligned with industry best practices and risk management frameworks.
- Contributing to research assessing third-party application vulnerabilities within electric vehicle platforms and proposing risk mitigation strategies to strengthen system security.
- Active member of the Mohawk College Cybersecurity Club, engaging in hands-on security labs and participating at Capture The Flag events such as CyberSci 2025

Advanced Diploma – Computer Programming and Analysis
Niagara College

January 2020 - June 2022

- Collaborated on a community-sponsored client project to develop an organized inventory, sales, and customer management solution to improve operational tracking and reporting.
- Mastered core principles of object-oriented programming and data structures, applying agile methodologies to design, test, and deploy scalable software applications

Microsoft Azure Fundamentals (AZ-900)

CompTIA Security+

AWS Certified Cloud Practitioner

Microsoft Certified: Security, Compliance and Identity Fundamentals (SC-900)

ISC2 Certified in Cybersecurity

PROFESSIONAL EXPERIENCE

Receiving Associate

October 2025 - Present

Bass Pro Shops - Niagara-on-the-Lake, ON

- Managed high-volume inventory processing and logistics, ensuring accurate tracking and organization of incoming shipments to support store operations
- Optimized the staging and routing of high-volume inventory from the loading dock to the retail floor, streamlining workflows during peak seasonal operation.
- Reconciled incoming physical shipments against digital purchase orders, investigating and resolving discrepancies to maintain high integrity within the inventory management database
- Assist with merchandising needs to ensure a positive customer experience.

Technical Support Representative

February 2024 - August 2025

Concentrix - Niagara Falls, ON

- Resolved complex technical inquiries by troubleshooting hardware and software issues, maintaining a high first-call resolution rate and ensuring strong customer satisfaction
- Kept a comprehensive understanding of client products like smartphones, tablets, computers, and wearables to diagnose and resolve technical issues effectively.
- Translated complex technical concepts into accessible, step-by-step instructions for non-technical users, consistently exceeding customer satisfaction metrics
- Documented technical issues, user interactions, and troubleshooting steps comprehensively within the ticketing system to ensure accurate tracking and efficient escalation

General Labour

Jan - Sept 2022

GXO Canada - Vaughan, ON

- Processed and digitally tracked inventory shipments, maintaining strict adherence to Amazon's standard operating procedures (SOPs) to ensure high data accuracy and quality control
- Facilitated inbound and outbound freight operations, strategically optimizing the loading and unloading process to safeguard products and improve dock-to-stock turnaround times.
- Executed systematic receiving and put-away procedures, organizing storage zones to accelerate product picking and streamline overall order fulfillment workflows.

IT Support Associate

June 2021 - September 2021

Verge Insurance Group - St Catharines, ON

- Provided Tier 1 technical support across remote, telephone, and email channels, efficiently diagnosing and resolving hardware and software issues to minimize user downtime.
- Managed incident lifecycles within an enterprise ticketing system, strictly adhering to ITIL best practices to ensure accurate documentation, tracking, and timely escalation of complex issues.
- Deployed and maintained physical and network infrastructure including servers, workstations, and peripherals, ensuring optimal system performance and secure network connectivity.
- Administered user lifecycle management via Active Directory, streamlining account provisioning while enforcing core Identity and Access Management (IAM) and least-privilege principles.
- Analyzed recurring service desk metrics to identify root causes, recommending and implementing proactive process improvements that enhanced overall IT service delivery and efficiency.
